Rainer Waser

May 21st, 2020 - Rainer Waser born September 16 1955 in Frankfurt is a German professor of electrical engineering at RWTH Aachen University. He is also director of the section electronic materials at the Peter Grünberg Institute which is located on the campus of Jülich Research Center Forschungszentrum Jülich. His research and teaching is on solid state chemistry and defect chemistry to electronic nanoelectronics and information technology 3rd edition

June 19th, 2018 - His research group is focused on fundamental aspects of electronic materials and on such integrated devices as non volatile memories specifically ferroelectric memories logic devices sensors and actuators throughout he has been collaborating with major semiconductor industries in Europe the US and the Far East.

Nanoelectronics Definition And Applications

June 2nd, 2020 - The term Nanoelectronics refers to the use of Nanotechnology in electronic components. These components are often only a few nanometers in size. However, the tinier electronic components become the harder they are to manufacture. Nanoelectronics covers a diverse set of devices and materials with

Nanoelectronics and information technology advanced

May 21st, 2020 - This outstanding textbook provides an introduction to electronic materials and device concepts for the major areas of current and future information technology on about 1,000 pages it collects the fundamental concepts and key technologies related to advanced electronic materials and devices.

Nanoelectronics and information technology 3rd edition

May 18th, 2020 - This outstanding textbook collects on about 1,000 pages the fundamental concepts and key technologies related to advanced electronic materials and devices. The third edition now holds 47 chapters and 203 pages. Grouped into eight sections, the first two sections are devoted to principles materials processing and characterization methods.
