Robert Dautray is the author of mathematical analysis and numerical methods for science and technology. A 3.00 avg rating 1 rating 0 reviews published 1

Scientific computing and numerical algorithms applied

June 4th, 2020 - Description: Computer simulation is heavily used in science and engineering as a tool in analysis, visualization, and design. Complex mathematical models can give very accurate prediction of real-world phenomena but typically lead to equations that can only be solved with the aid of a computer. This option focuses on the design, mathematical analysis, and efficient implementation of numerical methods.
