June 11th, 2018 - Red green color blindness is an X-linked recessive trait. In this problem set, we will establish the pedigree of Audrei's family and see how the color perception defect is passed on from one generation to the next. But first, let's look at a brief introduction to sex linked inheritance.

The Pedigree Chart Could Represent All of the Following

June 21st, 2018 - The only disorder that cannot be represented using a pedigree chart is sickle cell anemia. This is because hemophilia, red green color blindness, and Duchenne muscular dystrophy are all X-linked traits. On the other hand, sickle cell anemia is an autosomal recessive condition which cannot be represented in the pedigree chart since only sex linked.
